I am a motivated and adaptable full-stack developer with strong business acumen and excellent interpersonal skills. A recent graduate of RBK Rebootcamp, I am passionate about technology, experienced in both front-end and back-end development, and eager to innovate and launch my own projects .

## EXPERIENCES PROFESSIONNELLES

Jul 2023 -Aug 2023

WAMIA SERVICE - Thesis Project Mobile Applcation using (react native)

TASKS:

- React Native:** Proficient in integrating **cloudinary** for seamless access to the device's camera and gallery, enabling efficient media uploads and retrieval.
- Location Services:** Demonstrated ability to implement location functionality, utilizing the device's GPS capabilities to retrieve latitude and longitude coordinates for a given place or city, and skillfully displaying this data on interactive maps.
- Authentication:** Proficient in securing applications with **JWT** (JSON Web Tokens), ensuring robust user authentication and authorization. Accomplished in creating a seamless user experience for sign-up and login processes.
- Email Verification:** Proficient in incorporating email verification mechanisms, including code activation through **SendGrid** enhancing application security and user trust.
- Payment Integration:** Experienced in integrating **Stripe** for payment processing, enabling secure and convenient in-app purchases

Jun 2023

Electro Chafai E-commerce Web Site using (next.js)

TASKS:

- Seller Management:**  
Successfully designed and implemented a comprehensive seller management system, allowing each seller to have their own profile.  
Developed features enabling sellers to add products utilizing the Cloudinary platform, update product details, and delete products as needed.
- Product Filtering:**  
Created advanced product filtering functionality, allowing users to filter products by price range and product name, enhancing the overall user experience and making it easier for customers to find what they need.
- Payment Integration:**  
Seamlessly integrated the FLOUCI payment method into the application, enabling secure and efficient payment processing for users, contributing to a seamless and secure e-commerce experience.

Jun 2023

FripoShop E-commerce Web Site using (next.js)

TASKS:

- Next.js :**  
We leverage the power of Next.js to create a fast, server-rendered React application for a seamless user experience.
- Firebase :**  
Our authentication, real-time database, and cloud functions are all managed by Firebase, ensuring a secure and scalable environment.
- Mongoose :**  
We use Mongoose to work with MongoDB, providing a robust and flexible data storage solution for our e-commerce platform.

- **Strapi :**

Strapi serves as our headless CMS, enabling easy content management and customization.

- **Tailwind CSS :**

for the style and design our website .
